Administration Summary

This report provides an overview of your NSSE administration, including details about your population and sample, response rates, representativeness of your respondents, survey customization choices, and recruitment message schedule. This information can be useful for assessing data quality and planning future NSSE administrations.

Population and Respondents

The table at right reports your institution's population sizes, how many students were sampled (whether census-administered or randomly selected), and how many completed the survey.

Survey completions	First-year	Senior
Submitted population	728	552
Adjusted population ^a	671	479
Survey sample ^b	671	479
Total respondents ^b	209	186
Full completions ^c	176	165
Partial completions	33	21

a. Adjusted for ineligible students and those for whom survey requests were returned as undeliverable.

b. Targeted and locally administered oversamples were not included.

c. Completed at least one demographic question after the core engagement items on the survey.

Response Rate and Sampling Error^a

The table below summarizes response rates and sampling errors for your institution and comparison groups. For more information see NSSE's Response Rate FAQ: nsse.iub.edu/pdf/Resp_Rate_FAQ.pdf

	First-year				Senior			
	CBU	Maritimes	Canada	NSSE 2014	CBU	Maritimes	Canada	NSSE 2014
Response rate	31%	37%	30%	25%	39%	41%	32%	27%
Sampling error ^b	+/- 5.6%	+/- 1.2%	+/- 0.3%	+/- 0.2%	+/- 5.6%	+/- 1.2%	+/- 0.3%	+/- 0.2%

a. Comparison group response rate and sampling error were computed at the student level (i.e., they are not institution averages).

b. Also called "margin of error," sampling error is an estimate of the amount the true score on a given item could differ from the estimate based on a sample. For example, if the sampling error is +/- 5.0% and 40% of your students reply "Very often" to a particular item, then the true population value is most likely between 35% and 45%.

Representativeness and Weighting

The first table at right reports on variables submitted in your population file. Respondent and population percentages are listed side by side as a convenience to see how well the characteristics of your respondents reflect your first-year and senior populations.

Because females and full-time students are consistently overrepresented among respondents, NSSE weights results by institution-reported sex and enrollment status so institutional estimates reflect the population with respect to these characteristics. The second table at right provides the respondent and population proportions used to calculate your 2014 weights. For more information, see

nsse.iub.edu/html/weighting.cfm

Representativeness

	First-year		Senior	
	Respondent %	Population %	Respondent %	Population %

First-time, first-year	85	76	N/A	N/A
Race/ethnicity ^a				
Am. Indian or Alaska Native	N/A	N/A	N/A	N/A
Asian	N/A	N/A	N/A	N/A
Black or African American	N/A	N/A	N/A	N/A
Hispanic or Latino	N/A	N/A	N/A	N/A
Native Hawaiian/Other Pac. Isl.	N/A	N/A	N/A	N/A

Unknown	N/A	N/A	N/A	N/A

a. Based on the IPEDS categories (not available for Canadian institutions) submitted in the population file. Results not reported for institutions without full (at least 90%) race/ethnicity information in the population file.

Weighting

	First-year		Senior	
	Respondent %	Population %	Respondent %	Population %
Full-time, female	52	41	62	54
Full-time, male	27	31	26	30
Part-time, female	9	8	7	8
Part-time, male	12	20	4	7

Population File

Your institution provided a population file for survey administration and was afforded an opportunity to update it.

Population file options

Included "group" variables ^a	Yes
Identified an oversample ^b	No
Updated to identify ineligible students ^c	Yes
Identified students who completed BCSSE 2013 ^d	BCSSE not administered

- a. Institutions had the option to include additional variables in their population files for oversampling or for their own post hoc analyses. Up to five "group" variables were allowed; If formatting specifications were met, Group 1 can be used in the Report Builder–Institution Version.
- b. Institutions that did not survey all first-year and senior students (census) had the option to oversample a segment of their population. Oversamples may also be used to survey students in other class years.
- c. Institutions had the option to update their population file to identify students who did not return to campus in the spring or otherwise did not meet NSSE eligibility criteria.
- d. Institutions that participated in the Beginning College Survey of Student Engagement (BCSSE) can identify BCSSE survey respondents in their NSSE population file. This information is required to receive the longitudinal results in the *BCSSE-NSSE Combined Report*.
